Healthy Family

6 families with children aged 0 to 5 years benefit from concrete floors, providing better hygienic conditions for child development.

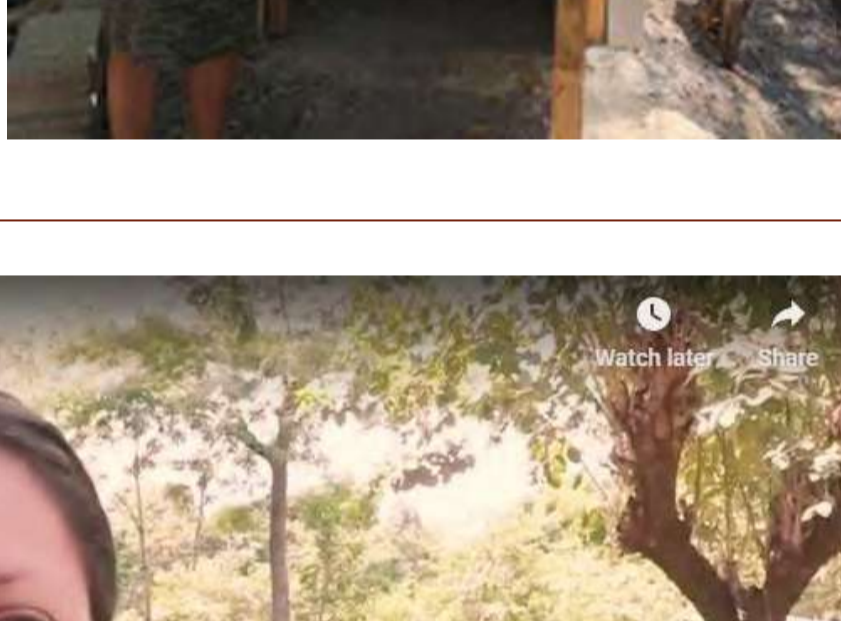

40 families that produce food in their family gardens are trained in making bocashi to fertilize the soil.

9 families approached with talks to promote better hygiene habits and conducted a survey on knowledge, attitudes and practices regarding healthy housing

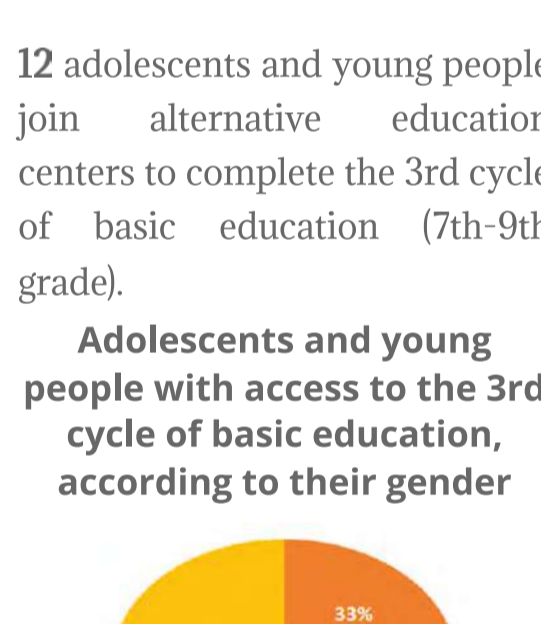

3 families improve basic sanitation conditions by building a washable latrine connected to a septic tank, reducing deprivation linked to multidimensional poverty.

Strengthening citizen participation for peace and development

Members of 2 Microbasin Councils: Namasigüe and Calaire, received 36 hours of training in the application of internal regulations and the performance of their functions in favor of caring for the environment, especially water resources.

5,000 plants are produced in 4 community nurseries that are implemented in coordination with microbasin councils and community water boards.

The Calaire Microbasin Council was supported in the construction of a 16-meter stone curtain to prevent erosion in the recharge area of the community's water source.

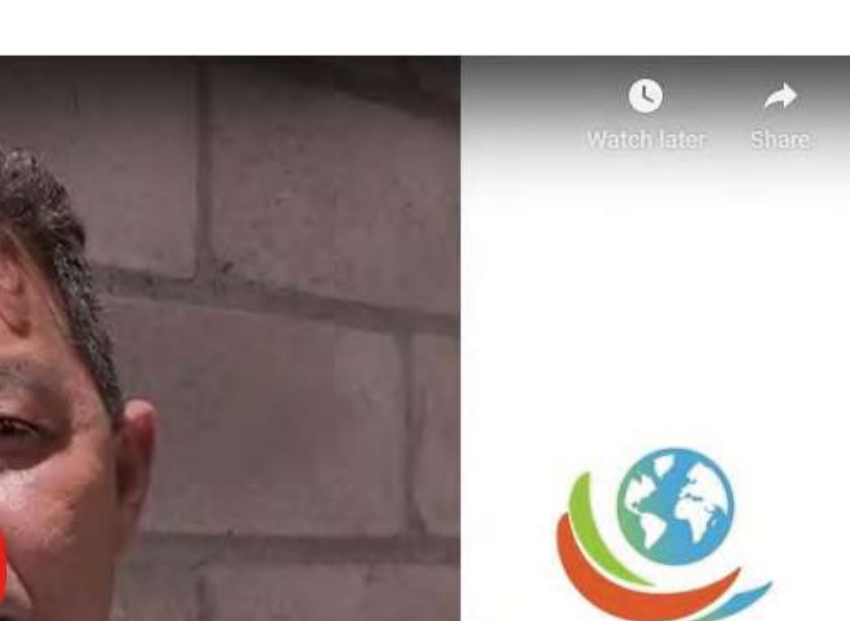

13 Rural Savings and Credit Banks had an annual evaluation of their administrative and accounting processes, savings, credit portfolio, contributions, and administration of basic grain banks.

Institutional Development

26 people, including Agrolibano Foundation collaborators and their families, participated in the first retreat "Change your mind, create a new reality", based on neuroscience, neuroplasticity, epigenetics, quantum physics and meditation, to generate changes in the state of being, allowing co-creation of a new personal reality with new healthy habits at a physical, mental and emotional level.
